SWIMKAM

Alert Today,
Alive Tomorrow.

Introducing SwimKam™.
Make your world a safer place
with our remote 360-degree
anti-drowning system.

For every child who dies from drowning, another 8* receive emergency hospital care for non-fatal drowning.

*Centers for Disease Control and Prevention, National Center for Injury Prevention and Control. Web-based Injury Statistics Query and Reporting System (WISQARS)

There are an estimated 320,000* drowning deaths every year.

Globally:

- Drowning is the 3rd leading cause of unintentional injury death.
- The highest drowning rates are among children 1–4 years, followed by children 5–9 years.

*StopDrowningNow.Org

Drowning: the silent killer

Death or disability from drowning shouldn't happen, let alone be the world's third biggest killer - but drowning doesn't always look like we'd expect - it's fast and silent and can happen in as little as 20-60 seconds.

It happens when we least expect it.
Drowning is the leading cause of unintentional injury-related death for children ages 1-4.

- Drowning is in the top 5 causes of unintentional injury-related death from birth to 5 years old.
- 23% of child drownings happen during a family gathering near a pool.

Pool safety means leaving no room for mishaps. Accidents can be prevented with an integrated approach to water safety.

The fact that there are still swimming pool drownings with other protection options in place says it all: one safety measure simply isn't enough for an unattended body of water.

**FOR TOTAL PEACE OF MIND,
WATER SAFETY NEEDS TO BE ABOUT
THE 1-2-3 OF LAYERING
PROTECTIVE MEASURES:**

1

Preventing unsupervised pool access

2

Alarming a parent or caregiver

3

Saving someone from drowning

Safeguard your family and pets from the risks associated with a swimming pool through intelligent life saving solutions that give you:

Always-on visual reassurance

A 360-degree view of your pool area at all times through our 3 cameras, all accessible via the mobile app.

Instant notification to multiple users

Push notification of any potential incidents with visuals are automatically issued to pre-selected contacts, parents and caregivers.

A voice to call for help

An on-board siren alerts nearby caregivers of the event, while the app provides one-touch access request to emergency services in your time of need.

What is SwimKam™?

SwimKam™ is an all-in-one revolutionary water warning system that reduces the risk of drowning and saves lives, providing affordable accessibility to remote monitoring for unattended pools and open areas of water.

How does it work?

1. Motion detection triggers activate three cameras in the event of an unexpected pool entry incident.
2. The SwimKam™ device transmits visual data from cameras over Wi-Fi to mobile devices via an app. You can add multiple users, as well as emergency services contacts.
3. An audible siren and beacon on the device is triggered while the app delivers instant push notifications to linked smartphones so that the necessary actions can be taken.

Please note: The SwimKam™ unit must be active only if the pool is unattended and unoccupied. When the pool is in use, the device must be temporarily removed and deactivated. The unit is small enough to do so, easily.

Alert Today, Alive Tomorrow.

The SwimKam™ difference lies in the fact that:

- It can be used effectively in waters of different clarity
- It is easy to set up, no pool changes or permanent fixture required
- It works with a multi-user smartphone app
- It is portable and maintenance-free
- It has an on-board siren with rechargeable battery (+/- 3 months between charges)
- It uses the highest-quality lithium battery for dependability
- It has a built-in solar array to cater for daytime power interruptions and battery backups
- It is capable of night operation with built-in illumination

Protect your family, fur-kids and guests with SwimKam™:

- Cost-effective, affordable anti-drowning solution
- Highly-portable and easy to use, take it with you on holiday
- Multiple fail-safe measures to ensure there are always eyes on your pool

Who is SwimKam™ for?

- Swimming pool owners
- Hospitality venues with swimming pools
- Swimming pool supply and equipment chains
- Home and baby stores

Whether parent, caregiver, retailer or business, everyone has a duty to play their part in drowning prevention.

SwimKam™ enables an integrated approach to water safety which can make all the difference between life and death, should the unthinkable happen.
