

SWIMKAM

SwimKam™ promises peace of mind that your family, pets and guests are safeguarded from accidental drowning, death and disability.

SwimKam™ is an all-in-one revolutionary system that enables an integrated approach to water safety. Having all the right layers of protection in place means leaving no room for accidents.

The fact that there are still swimming pool drownings with other protection options in place says it all: one safety measure simply isn't enough for an unattended body of water.

**FOR TOTAL PEACE OF MIND,
WATER SAFETY NEEDS TO BE ABOUT
THE 1-2-3 OF LAYERING
PROTECTIVE MEASURES:**

1. Preventing unsupervised pool access

2. Alarming a parent or caregiver

3. Saving someone from drowning

Our intelligent life-saving solution gives you:

Always-on visual reassurance

A 360-degree view of your pool area at all times through 3 cameras, accessible with our mobile app.

Instant notification to multiple users

Push notification of potential incidents with visuals automatically issued to pre-selected contacts, parents and caregivers.

A voice to call for help

An on-board siren alerts nearby caregivers, while the app provides one-touch access to request emergency services in your time of need.

SwimKam™ is a cost-effective, affordable anti-drowning solution.

Portable, free-standing	✓	Easy to take with on holiday	✓
